

IN THE CLAIMS:

D1 --1. (Twice Amended) An aqueous dispersion of a vinylidene fluoride polymer, which comprises a vinylidene fluoride polymer having an average particle size of not more than 320.1 nm, wherein a solid content is from 30 to 50 % by weight, [and] a content of a fluorine-containing surfactant is not more than 1% by weight on the basis of water, and the aqueous dispersion excludes a nonionic non-fluorine-containing surfactant.--

D2
Sub
E1 --6. (Amended) An aqueous dispersion of a vinylidene fluoride polymer, which comprises a vinylidene fluoride polymer having an average particle size of not more than 200 nm, wherein a solid content is from 30 to 50 % by weight, [and] a content of a fluorine-containing surfactant is not more than 1% by weight on the basis of water, and the aqueous dispersion excludes a nonionic non-fluorine-containing surfactant.--

REMARKS

Claims 1 and 6 have been amended to define that the presently claimed aqueous dispersion excludes a nonionic non-fluorine-containing surfactant. This limitation in applicant's claims is supported in the description of Comparative Examples 1 to 4 on page 12, lines 9-16, and elsewhere in applicant's specification disclosure. When describing Comparative Examples 1 to 4, applicant's specification disclosure explains that these examples are the
